

## Company Fact Sheet

### HEADQUARTERS

365 Boston Post Road  
Sudbury, MA 01776

### YEAR FOUNDED

2005

### COMPANY VISION

Lotsa Helping Hands was created after one of its founders experienced four years of awe-inspiring community support in response to a family member's serious medical crisis. Seeing how earnestly friends wanted to help, and juggling the difficulty of organizing their assistance, the founders designed Lotsa Helping Hands based on a first-hand understanding of the need to bring together a variety of social circles and provide them with tools

- where family caregivers feel empowered to ask for help, and in so doing, improve their own health and quality-of-life,
- where volunteers can become part of the solution without contributing to the problem, and
- where community becomes a recognized way to find meaning in both giving and receiving.

### About Lotsa Helping Hands

Lotsa Helping Hands is a free online volunteer caregiving coordination tool that allows family friends, neighbors, and colleagues to more easily assist with the daily meals, rides, shopping, housecleaning, and errands that become a challenge during times of medical crisis, caregiver exhaustion, or when caring for an elderly loved one. It's also a place to securely share vital medical, legal, or financial information with designated family members while keeping these 'circles of community' informed with status updates, photo galleries, message boards, and more.

### EXECUTIVE TEAM

- Hal Chapel, CEO & Co-Founder
- Barry Katz, President & Co-Founder

### PARTNERS & COMMUNITIES

To date, more than 8,000 Lotsa Helping Hands communities have been created around the world. Lotsa Helping Hands has partnered with more than 50 of the most respected health-related organizations that have co-branded the service to provide their members with access to this important tool, including the ALS Association, Alzheimer's Association, American Lung Association, Brain Tumor Society, Lance Armstrong Foundation, Leukemia & Lymphoma Society, National Multiple Sclerosis Society, National Ovarian Cancer Coalition, and National Stroke Association.
